DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese reference no. 63-195712.

The above reference discloses, among other things, a drive part 11 for holding the bobbin; a guide member 24 for guiding at least one side surface of the rectangular cross section wire member, wherein winding is performed while the guide member regulating a winding position of the rectangular cross section wire member such that a side surface of the rectangular cross section wire member already wound on an outer periphery of a wound portion of the bobbin or the bobbin-less winding jig closely adheres to a side surface of the rectangular cross section wire member just to be wound. The guide member moves in the axial direction via the screw drive. The bobbin has a flange portion (unnumbered, left end of bobbin). The wire is

wound in a plurality of tiers (see Figure 3). The guide member comprises a first and second guide bar (21, 24).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
